# Ivo Freitas

Senior Software Engineer - AI enablement - Go | AWS | Terraform | High-Scale Systems  
Franca, São Paulo, Brasil

## Resumo

A strong background in software development, with over nine years of experience in various domains, such as fintech, retail, and advertising. I have worked with a wide range of technologies, including relational and no relational databases, backend languages and frameworks, integration and messaging tools, cloud services, API standards, and visualization platforms.

I am passionate about learning and staying up to date on the latest technology trends. I am always looking for new challenges that allow me to expand my knowledge and apply my skills to create impactful solutions. I have a results-oriented approach and focus on efficiently and effectively solving complex problems. I value collaboration and teamwork, and I enjoy working with diverse and talented people who share my vision and goals.

---

## Experiência

### Pretty Technical

Senior Software Engineer  
agosto de 2025 - Present (1 ano 1 mês)  
Londres

Platform for regulated online gaming operators

Main role: player account management and payment services.

- Designed and delivered backend services in Go, utilizing gRPC, Kafka, and PostgreSQL for player lifecycle management and payment orchestration.
- Led a comprehensive authentication hardening program, enhancing security across all microservices with zero downtime.
- Implemented a backend-wide testing initiative, significantly raising unit-test coverage and standardizing testing practices across the platform.

### Zazmic Inc

Senior Software Engineer  
dezembro de 2021 - agosto de 2025 (3 anos 9 meses)  
São Paulo, Brasil

Designed and built solutions for the advertising sector, delivering a scalable, resilient distributed system that captured ad events in real time.

- Built real-time commission calculation pipelines processing millions of ad events daily
- Wrote asynchronous components in Golang and Java, with Kafka handling pub/sub
- Automated CI/CD with CircleCI and hosted the solution on GCP with GKE
- Extracted and visualized metrics with Grafana, achieving a fault-tolerant, scalable event system

## TradersClub

### Senior Software Engineer

junho de 2021 - dezembro de 2021 (7 meses)

São Paulo, Brasil

Designed and built solutions for the fintech sector, delivering a high-performance notification platform with user preference filtering.

- Optimized back-end architecture and query efficiency for personalized user alerts
- Applied clean architecture and coding practices to improve performance
- Refactored and tested the existing notification service based on user preferences
- Collaborated closely with the client to incorporate feedback, earning positive client feedback and increased platform adoption

## Luizalabs

### Software Engineer

julho de 2019 - junho de 2021 (2 anos)

Franco, SP

Developed and maintained high-throughput microservices, driving technical innovation to improve system reliability and scalability.

- Designed applications for a high-availability environment handling 500,000+ requests per minute
- Refactored the product service, improving performance and maintainability
- Mentored junior engineers on best practices and technical problem-solving
- Collaborated cross-functionally to ensure smooth deployment and integration

## Loja do Mecânico

## Software Engineer

setembro de 2018 - julho de 2019 (11 meses)

Franco, SP

Spearheaded the modernization of customer communication by integrating the WhatsApp Business API.

- Developed a Java application integrating WhatsApp Business API, exposed as a REST service
- Implemented automated notification logic for e-commerce sales
- Reduced help desk support needs by modernizing and automating customer communication channels

## SMN Tecnologia da Informação

### Java Software Engineer

setembro de 2017 - setembro de 2018 (1 ano 1 mês)

Franco, SP

Analyzed requirements for internal automation projects, optimizing manual and back-office processes to improve operational efficiency.

## Adekz Tecnologia

### Web and Database Engineer

setembro de 2016 - setembro de 2017 (1 ano 1 mês)

Рибейран-Прету, SP

Analyzed business requirements, managed development and testing, and delivered robust, high-quality web systems.

## Konia Tecnologia

### ALM junior

setembro de 2015 - setembro de 2016 (1 ano 1 mês)

São Paulo, Brasil

Provided instruction and support on the adoption and use of TFS (Team Foundation Server).

---

## Formação acadêmica

### Universidade Estadual Paulista Júlio de Mesquita Filho

Bachelor's in Computer Science, Information Technology · (fevereiro de 2007 - janeiro de 2012)

### Senac Rio Preto

Postgraduate course in Systems Development, Information  
Technology · (janeiro de 2015 - dezembro de 2017)

UNESP - Universidade Estadual Paulista "Júlio de Mesquita Filho"  
Bachelor's Degree, Computer Science

Senac São Paulo  
Postgraduate Degree, Development Studies
